Built with Spring Boot, offering RESTful APIs for product, category, customer, cart, and order management. User-friendly interface for customers to browse, order, and track purchases.

Tech Stack:

Java | Spring Boot | Spring Data JPA | MySQL | React (Frontend)

Key Features:

- User-friendly interface
- Seamless product browsing and ordering
- Efficient order tracking
- Admin capabilities for product and order management

👛 PROFESSIONAL EXPERIENCE

Associate Software Engineer (TechMahindra)

03/2022 – 04/2023 | Noida, India

As an Associate Software Engineer, I had the opportunity to work on a project for Airtel, a renowned telecommunications company. My role involved actively contributing to the development and maintenance of software solutions tailored to the specific requirements of the Airtel client. Throughout the project, I collaborated with a team of skilled professionals, working together to ensure efficient delivery of reliable applications. This experience provided me with valuable insights into client-driven projects and the telecommunications industry.
